

MULTI-TAP LOW VOLTAGE TRANSFORMER

Description

The low voltage transformer is for 12V landscape lighting. It converts the 120 volt to a low voltage between 12V and 15V.

This low voltage transformer is an efficient multi-tap transformer. It provides high performance and energy saving. With high quality toroidal cores and robust wiring and internal components, it provides a high stable source of current with low energy consumption. It ensures the low voltage landscape lighting system runs at optimal efficiency.

Features

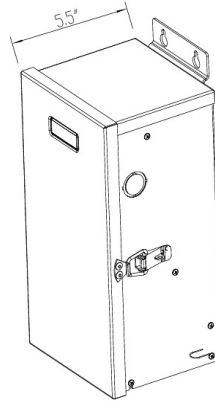

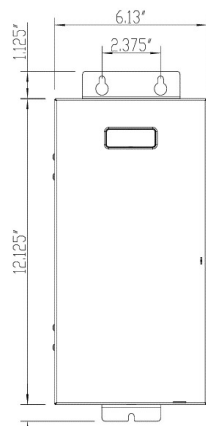

- Toroidal cores
- Multi-tap: 12V, 13V, 14V, 15V
- Thermal & overload breaker
- Stainless steel construction with removable cover
- Easy for installation
- ETL listed

Specs

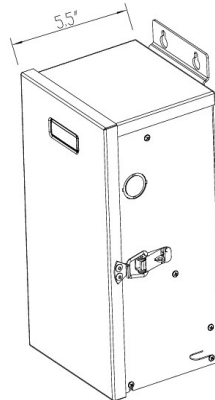

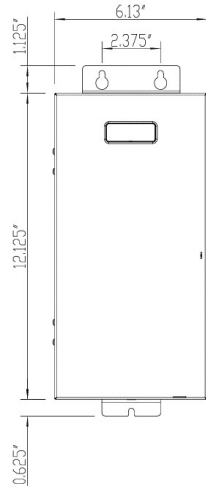

Input	120V
Voltage taps	12V, 13V, 14V, 15V
Power	150W, 300W, 600W
Core	Toroidal cores
Housing	304 stainless steel
Wire	5ft 18 AWG SJTW
Protection	Over-heat & Over-load
Certification	ETL
Application	For both outdoor and indoor use

Product dimension

TF150W

TF300W

TF600W
